

**Sustainability Goal:** Created in the spirit of a base camp, the Metolian is envisioned to minimize its impact on the land, be as self-sufficient as possible, and in the process, assist others in the Basin with efforts to improve the health of the surrounding environment.

**Low-Carbon Mobility**

- Emphasis on walking/biking
- Low impact roads
- Interconnected trails

**High Efficiency Buildings**

- Low energy use
- Natural cross ventilation
- Active/passive solar
- Sustainable materials

**Minimizing Footprint**

- Clustering of buildings
- Shared circulation
- Reduced hard surfaces
- Shared amenities
- Deed restrictions on open space

**Habitat**

- Native plant communities
- Restoring drainages & forest health
- Improving wildlife habitat
- Providing habitat corridors

**Energy | Water**

- Surface water collection - efficient use
- Recycled water use
- Minimal irrigation
- Natural drainage
- Solar orientation
- Reduced hard surfaces
